Subject: Microsoft Settlement

I believe the proposed settlement is a bad idea, and ultimately will have little or no effect.

My name is Erik Vered and I live in Indianapolis Indiana where I have worked as a software engineer/software systems anylyst for over 15 years. Most of that time was spent working with Microsoft tools and systems.

I can tell you with confidence that the proposed settlement will do more to protect Microsoft than it will to curb anti-competitive practices.

I hope the court will be wise and NOT enact this settlement.

thank you for your time,
Erik Vered
